Assigned by:

Dr. Kelly Parker- Grand Valley State University

Professor- ENS 401

Philosophy Department

Email: parkerk@gvsu.edu

Role: Additional input when needed, always aware of project progress

Community Partner:

Office of Sustainability Practices- Grand Valley State University

Yumiko Jakobcic

Campus Sustainability Coordinator

Email: jakobciy@gvsu.edu

Norman Christopher

Executive Director

Email: chrisfn@gvsu.edu

Students:

Grant Borregard- Engineering

Victoria Graves- Communication Studies

Paul Lamphere- Natural Resource Management

Cassie Pataro- Sustainable Food Systems

Mara Spears- Communication Studies

Problem Analysis:

There are a lot of factors that contribute to recycling practices and policies, which means there are many areas we could choose to focus on. Therefore, in order to identify the best approach for our team, we participated in brainstorming sessions. The following chart is the outcome of those sessions. As evident, there are clear links between a variety of current issues. Split into two categories, the items in gray represent aspects Environmental Studies Capstone students do not have control over, while the items in white are issues that are controllable and need change. For obvious reasons, we chose to focus on the aspects we have some control over. By examining the chart, we realized the core issues for recycling are a lack of education, and a lack of communication. This lead us to our final problem statement.

Problem Statement:

“Residents of Grand Valley’s off-campus apartment complexes are in need of clear education of the proper uses of existing recycling infrastructure in order to maximize effectiveness.”

Metrics

	Campus View	Campus West	Copper Beech	Meadows	Trio	48 West
Number of Residents	~1000	709	~900	~740	~950	920
What can be recycled	Mixed	Mixed	N/A	Paper only	Mixed	One mixed bin, one paper only bin
Waste Company	Waste Management	Potluck Pick-Up	Waste Management	Republic	Waste Management	Republic
Number of Bins	1	1	16 - waste	1	3	1
Pickup Schedule	When called in	Wednesday	Tuesday, Thursday	When Full	Tuesday	

Solutions:

Plan- create an informational refrigerator magnet to be placed in apartment units.

Elaboration- In order to focus on communicating information to residents and apartment complex management in a realistic fashion, the final plan is to create a template for a refrigerator magnet that can be tailored to every apartment complex which communicates the basics of recycling in that complex. This magnet is meant as a permanent item on the refrigerator in every apartment in order to be present and on the minds of residents in the area of their home where they are most likely to recycle and accumulate the highest number of recyclable items.

Questions/Concerns

Contact info:

What cannot be recycled?

- Plastic Bags
- Styrofoam™ Food/Beverage Containers and Shipping/Packing Material
- Food Waste
- Wet or Food-Soiled Paper
- Waxed Paper Plates, Cups, and Takeout Containers
- Greasy Paper Boxes
- Tissues, Paper Towels, and Napkins
- Light Bulbs
- Petroleum and Non-Consumer Glass
- Electronics
- Cancer Squirt (VHS and audio)
- Garden Hoses
- Nails/nails and Springs

What can be recycled?

PLASTICS
Empty and rinsed - caps are OK

- All Food and Beverage Containers
- Food Plastics: Tearable Containers
- Plastics: Cold Drink Cans and Lids
- Shampoo and Shampoo Bottles
- Pump and Spray Bottles
- Plastic Pots, Buckets, Garden Pots

METALS
Empty and rinsed

- Aluminum: Beer and Tin Cans
- Empty Food Cans
- Empty Aseptic Cans
- Metal Tins and Empty Dishes
- Tin Lids and Bottle Caps
- Clean Aluminum Pail

PAPER

- Newspapers and Inserts
- Magazines, Brochures, and Catalogs
- Junk Mail: Envelopes, Heavy Paper
- Single Paper
- Paper Bags
- Phone Books
- Paperback Books
- Shipping Cartons, GSK (Ships over mail)

GLASS
Empty and rinsed - caps are OK

- All Bottles and Jars

CARDBOARD
Flattened on top of pieces and feet

- Crushed Cardboard Shipping Boxes
- Paper-Towel Boxes
- Egg Cartons
- Dry Food Boxes

CARTONS
Empty and rinsed

- Milk
- Juice
- Ice Cream
- Wine
- Beer

Results:

Campus View, Campus West, Meadows, and Trio did not attend the meeting. 48 West and Copper Beech were the two attendees. 48 West was very receptive of the magnet idea, but overall was unsure if their residents cared about recycling. The reason cited for this was that it is finals week, so we believe she may not have understood the scope or purpose of our project, and it may have been a misunderstanding. We had the best results with Copper Beech, as she was very interested in our project and open to further communication. The management at Copper Beech are hoping to incorporate recycling infrastructure into their complex next year. They were also very receptive of the magnet idea, and she brought up the idea of hosting an event to teach their residents how to properly use the new recycling bins when they get them.

Comments & Suggestions:

- Conduct another meeting wherein all off-campus apartment complexes can be present
- It would be beneficial to take a survey of apartment complex residents to gain a better understanding of things like:
 - How much recycling influences where residents live
 - If residents care about recycling
 - If residents want recycling
 - If residents would be willing to spend more to have recycling in their complex
- Create a presentation tailored to each complex about how to recycle their
- Conduct a survey to gain knowledge and statistics to inform complexes of their residents' interest in recycling at their complex

Future Steps:

- Hand over templates to complexes
- Give final report to Office of Sustainability Practices
- Pass on project to future students/campus connections
- Continued follow up with complexes, specifically Copper Beech
- Conduct another meeting next year with all apartment complex representatives present
