Index

arclength, 88
average value over a solid, 260
center of mass
  of a lamina, 231
  of a solid, 260
centroid
  of a lamina, 231
change of variable
double integral, 287
triple integral, 289
Cobb-Douglas production function, 196
continuity, 107
coordinate planes, 6
critical point, 176
cross product, 46
curvature, 92
cylindrical coordinates, 271
differentiable function, 151
differentials, 144
directional derivative, 162
discriminant, 179
dot product, 34
double integral
average value, 204
definition, 203
difference in volumes, 204
mass of lamina, 228
probability, 233
double integral over a general region, 218
double Riemann sum, 202
function
differentiable, 140
domain, 3
direction vector, 57
in space, 57
parametric equations, 59
vector equation, 58
locally linear, 55
mass
  of a solid, 260
moments about coordinate axes, 231
parameterization
curve, 67
surface, 248
parametric equations for a curve, 67
partial derivatives
  first-order, 115
  second-order, 127
  second-order, mixed, 128
  second-order, unmixed, 128
plane
definition, 59
scalar equation, 60
vector equation, 60
polar coordinates, 238
position vector, 22
principal unit normal vector, 97
projectile motion
  parametric equations, 81
radius of curvature, 98
sphere
  definition, 6
  formula, 7
spherical coordinates, 275
surface area, 253
trace, 8
triple integral, 260
triple Riemann sum, 259
triple scalar product, 49

vector
  angle between, 35
  component in the direction of, 39
  definition, 21
  projection, 39
  subtraction, 24
  sum, parallelogram, 26
vector-valued function
  antiderivative, 79
  definition, 67
  derivative, 74
  indefinite integral, 79
vectors
  orthogonal, 37
volume of a solid, 260
