Professor of Geology

Judy Whipps, Ph.D.

Professor of Liberal Studies

Message from Nancy M. Giardina

Assistant Vice President for Academic Affairs

We are proud to present the thirteenth volume of the Grand Valley State University McNair Scholars Journal. It is the culmination of intensive research conducted by our student scholars and their faculty mentors through our Ronald E. McNair Scholars Program.

The Ronald E. McNair Scholars Program, now in its 15th year here at Grand Valley State University, provides an opportunity for students and faculty to apply much of what is learned within the classroom by engaging, outside the classroom, in research activities in a particular area of scholarly interest. These research activities provide a journey through the challenges and affirmations of scholarly work and better prepare students for graduate study and the pursuit of a doctoral degree.

Thank you to the faculty mentors who have worked so closely with our McNair Scholars to propel their research skills towards the next level of educational challenges.

Congratulations to the nine McNair Scholars whose research is presented here. Your journey and the challenges you have met during this scholarly activity speak to your talents and persistence in pursuing both your educational and life goals. Thank you for sharing your talents with the university community and continuing the spirit of this program.

Finally, thank you to all the people behind the scenes that work to sustain this program and produce this journal. Your work is valued as well.

Nancy M. Giardina, Ed.D.

Assistant Vice President for Academic Affairs

GRAND VALLEY
STATE UNIVERSITY

“Before you can make a dream come true, you must first have one.” - Ronald E. McNair, Ph.D.

Ronald Erwin McNair was born October 21, 1950, in Lake City, South Carolina, to Carl and Pearl McNair. He attended North Carolina A&T State University where he graduated Magna Cum Laude with a B.S. degree in physics in 1971. McNair then enrolled in the prestigious Massachusetts Institute of Technology. In 1976, at the age of 26, he earned his Ph.D. in physics.

McNair soon became a recognized expert in laser physics while working as a staff physicist with Hughes Research Laboratory. He was selected by NASA for the space shuttle program in 1978 and was a mission specialist aboard the 1984 flight of the USS Challenger space shuttle.

After his death in the USS Challenger space shuttle accident in January 1986, members of Congress provided funding for the Ronald E. McNair Post-Baccalaureate Achievement Program. The goal is to encourage low-income, first generation students, as well as students who are traditionally underrepresented in graduate schools, to expand their opportunities by pursuing graduate studies.

Ronald E. McNair Post-Baccalaureate Achievement Program

The Purpose

The McNair Scholars Program is designed to prepare highly talented undergraduates to pursue doctoral degrees and to increase the number of individuals (from the target groups) on college and university faculties.

Who are McNair Scholars?

The McNair Scholars are highly talented undergraduate students who are from families with no previous college graduate, low-income background or groups underrepresented at the graduate level for doctoral studies. The program accepts students from all disciplines.

Program Services

The McNair Scholars are matched with faculty research mentors. They receive academic counseling, mentoring, advising, and GRE preparation. In addition to the above services, the McNair Scholars have opportunities to attend research seminars, conduct research, and present their findings orally or written via poster presentations. In the first semester of their senior year, the scholars receive assistance with the graduate school application process.

Funding

The Ronald E. McNair Post-Baccalaureate Achievement Program is a TRiO Program funded through the United States Department of Education and Grand Valley State University.

Table of Contents | 2009 McNair Scholars

Marcus Bell	6
Reflections of Whiteness: The Origins, Progression, and Maintenance of White Supremacy as a Cultural, Political, and Economic Force in American Institutions Faculty Mentor: George Lundskow Ph.D.	
Neil Biegalle	20
Investigations in the Geometry of Polynomials Faculty Mentor: Matthew Boelkins Ph.D.	
Mary J. Brown	40
Campus Triple Bottom Line – College Sustainability and Grand Valley State University Faculty Mentor: Jaideep Motwani, Ph.D.	
Wendi-Jo L. Ervin	48
Co-localization of histamine and eGFP in the central nervous system of <i>Drosophila melanogaster</i> Faculty Mentor: Martin G. Burg, Ph.D.	
Delia Fernández	53
From Soldadera to Adelita: The Depiction of Women During the Mexican Revolution Faculty Mentor: David Stark Ph.D.	
Alfredo Hernandez Corsen	63
An Exploration of Language, Culture and Limited Perspectives Faculty Mentor: Judy Whipps Ph.D.	
Anne K. McNeely	72
Assessing the Utility of Genetic Data as a Monitoring Tool: A Case Study of Eastern Red Bats (Chiroptera: Vespertilionidae: <i>Lasiurus borealis</i>) Faculty Mentor: Amy Russell, Ph.D.	
Mallory Morell	83
Quaternary Geology, Toco, Trinidad, West Indies Faculty Mentors: John Weber, Ph.D. and Pablo Llerandi-Román, Ph.D.	
Kurt O'Hearn	104
Computer-Aided Student Study Group Formation Faculty Mentor: Roger Ferguson Ph.D.	
T. R. Stambaugh	135
Development of the Innate Immune Response in Nestling Tree Swallows (<i>Tachycineta bicolor</i>) Faculty Mentor: Michael Lombardo, Ph.D.	
About the TRiO Programs	142
