

Sexist Pig
Dan Goodrich

well,
you know,
it's a funny thing,
being male—
because one or
both of your testicles
may or may
not descend properly
before or after birth.
this could cause
problems at some
point
in the future.

like, they could
descend with their tubes all
twisted. and this could result
in poor blood circulation
and a general feeling of
badness.

when i hear
about things like
this, i get a
cold, hollow feeling
down there,
and i can't think
much about love
or feminism,
i just think about
finding a good mechanic
and getting my parts
oiled.
