

**Grand Valley State University Libraries
ScholarWorks@GVSU Institutional Repository**

ScholarWorks Submission Agreement - School of Computing & Information Systems

ScholarWorks@GVSU is an open-access repository maintained by the Grand Valley State University (GVSU) Libraries to showcase, preserve, and provide access to the scholarly and creative work produced by the GVSU community. **To complete the submission of your project please send this form along with your final project document(s) to cis@gvsu.edu and copy your Faculty Member or Advisor.** For more information, email scholarworks@gvsu.edu, or visit our webpage at <http://scholarworks.gvsu.edu/about.html>.

Please select **one** of the following options:

I agree to grant the GVSU Libraries a non-exclusive license to provide online **open access** to my submitted scholarly/creative work via ScholarWorks@GVSU. *You retain all copyright in your work, but you give us permission to make it available online for anyone to read and to preserve it in ScholarWorks@GVSU.*

I agree to grant the GVSU Libraries a non-exclusive license to provide **limited access** to my scholarly/creative work to the GVSU community via ScholarWorks@GVSU. *You retain all copyright in your work, but give us permission to make it available to users logged in to the GVSU network, and to preserve it in ScholarWorks@GVSU. The public abstract and the title of your work will be visible online for anyone to see, but your full work will only be available to the GVSU community.*

Embargo – Optional: *You may choose to restrict electronic access to your work for up to three years from the date the work is submitted to ScholarWorks. When the embargo expires, your work will become available.*

Note: *Your title and public abstract will still be visible online during the embargo. If your title or abstract contains confidential, patent-related, or sensitive information, please ensure you change it.*

Length of Embargo: _____

Keywords: *Provide several relevant words that describe the content of your work.*

Machine Learning
Clinical Laboratory Data
Ferritin
Health Informatics

Public Abstract/Description: *Provide a short description of your work. You may use the abstract from your work, modify it, or create a new description.*

As the amount of data generated by the clinical laboratory continues to increase, it is important to identify new methods to analyze it. Machine learning could be used as a tool to identify relationships that may otherwise get overlooked. This study expands on the work done by Luo et al. (1) to better understand classification methods that could be used to predict ferritin levels from common lab results and demographics. First, my study determines whether or not prediction accuracy is affected by a different sample group and a reduction of predictive variables than those used by Luo et al. (1). Second, multiple machine learning models are compared to determine if there is a difference between them. Logistic regression, decision tree, artificial neural network., and support vector machine learning models were created using R and R packages. Results showed that while these methods can predict abnormal ferritin levels accurately, further studies will need to be done to identify whether or not the level of accuracy is sufficient for the clinical environment.

I warrant as follows:

- 1 I hold the copyright to this work, and agree to permit this work to be posted in the ScholarWorks@GVSU institutional repository.
- 2 I understand that accepted works may be posted immediately as submitted, unless I request otherwise.
- 3 I have read, understand, and agree to abide by the policies of ScholarWorks@GVSU. (Our policies can be found at: <http://scholarworks.gvsu.edu/about.html>.)

By typing my name into the Author field I am agreeing to the terms above and attaching my electronic signature. I understand that if I do not agree to these terms, I should not type my name.

Title: An Evaluation of Machine Learning Methods to Predict Ferritin from Clinical Laboratory Results and Demographics

Author: Laura Tate Date: 4/27/2020

Faculty Member/Advisor: Dr. Guenter Tusch Date: 04/27/2020

Community Partner (if needed): _____ Date: _____
