

# Index

- $T_1$ -space, 138
- $T_2$ -space, 138
- $T_3$ -space, 138
- $T_4$ -space, 138
- $\delta$ -neighborhood of a point in a metric space, 69
  
- accumulation point in a metric space, 96
- Archimedean property, 53
  
- basic open set, 121
- basis
  - elements, 121
  - for a topology, 121
- boundary in a topological space, 136
- boundary point in a metric space, 96
- boundary point in a topological space, 136
- bounded subset of  $\mathbb{R}^n$ , 177
- box topology, 218
  
- cardinality of a set, 24
- Cartesian product, 9
- Cauchy sequence, 187
- Cauchy-Schwarz Inequality, 36
- clopen set in a topological space, 132
- closed set in a topological space, 132
- closed subset of a metric space, 96
- closure in topological spaces, 135
- closure of a set in a metric space, 100
- compact subset, 174
- component, 194
- composition of functions, 18
- connected space, 190, 198
- continuity at a point in a metric space, 60
- continuity in a topological space, 145
- continuous function, 60
  
- convergent sequence in a topological space, 134
- coordinate space, 111
- cover, 174
  - open, 174
- cut point, 196
- cut set, 196
  
- derived set, 133
- digital arc, 228
- digital Jordan curve, 228
- digital line topology, 128
- digital path, 228
  
- equivalence relation, 150
  
- factor space, 111
- finite set, 23
- Frechet space, 138
- function, 15
  - bijection, 17
  - codomain, 16
  - domain, 16
  - identity, 18
  - injection, 16
  - inverse, 20
  - open, 146
  - range, 16
  - restriction, 17
  - surjection, 17
  
- Gluing Lemma, 207
- Golomb space, 119
- greatest lower bound, 50
  
- Hausdorff space, 137
- hereditary property, 159

- Hilbert space, 112
- homeomorphic spaces, 149
- homeomorphism, 149
- identification space, 164
- identity function, 62
- image of an element, 16
- indexed family of sets, 8
- induced topology, 157
- infimum, 50
- interior of a set, 80
- interior point, 123
- interior point in a subset of a metric space, 76
- interval, 5
- isolated point, 141
- isolated point in a metric space, 96
- isometry, 148
- Klein bottle, 165
- least upper bound, 51
- limit of a sequence in a metric space, 87
- limit of a sequence in a topological space, 134
- limit of a sequence of real numbers, 86
- limit point in a metric space, 96
- limit point in a topological space, 133
- locally compact, 183
- locally connected, 200
- lower bound, 50
- Möbius strip, 165
- metric, 34
  - discrete, 38
  - Euclidean, 36
  - Hamming, 45
  - Hausdorff, 185
  - Levenshtein, 47
  - max, 35
  - taxicab, 31
- metric space, 34
  - complete, 187
- metrically equivalent, 148
- metrizable topological space, 122
- minimal neighborhood, 209
- neighborhood in a metric space, 69
- neighborhood in a topological space, 122
- normal topological space, 138
- open ball in a metric space, 40, 68
- open function, 146
- open set in a metric space, 75
- open sets in a topological space, 118
- path, 205
- path component, 208
- path connected, 206
  - locally, 210
- path product, 208
- power set, 12
- preimage of an element, 16
- product metric, 111
- product metric space, 110
- product topology, 218, 220
- projection functions, 219
- quotient map, 163
- quotient space, 163, 164
- quotient topology, 163
- real projective plane, 170
- regular topological space, 138
- relation, 150
- relative topology, 157
- relatively closed set, 157
- relatively open set, 157
- retract, 171
- retraction, 171
- separation, 193
- sequence in a metric space, 87
- sequence in a topological space, 134
- set, 6
  - arbitrary intersection, 8
  - arbitrary union, 9
  - complement, 7
  - intersection, 6
  - union, 6
- set difference, 6
- Sorgenfrey line, 140
- subbase, 220
- subbasis, 220
- subcover, 174
  - finite, 174
- subspace of a metric space, 108

- subspace of a topological space, 156
- subspace topology, 157
- supremum, 51
  
- topological invariant, 151
- topological property, 151
- topological space, 118
- topologically equivalent, 149
- topologist's sine curve, 212
- topology, 117
  - cofinite, 119
  - discrete, 118
  - Double Origin, 142
  - excluded point, 127
  - finite complement, 119
  - indiscrete, 118
  - Khalimsky, 227
  - lower limit, 140
  - metric, 119, 122
  - particular point, 127
  - Zariski, 128
- topology generated by a basis, 121
- triangle inequality, 34
  
- Zariski topology, 128
