

On the path to a sustainable future

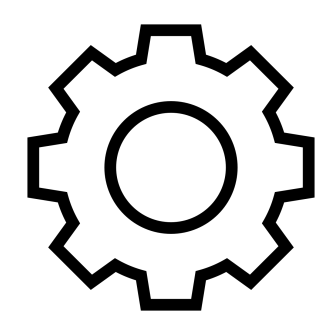

Did you know?

IN ONE **40 MINUTES** PERIOD,
THE **SOLAR ENERGY** THAT
HITS THE EARTH COULD
FULFIL ALL HUMAN ENERGY
NEEDS **FOR A YEAR.**

It's happening on your campus

A large solar installation that any Consumers Energy electric customer, both residential and business, can subscribe to. Consists of approximately 11,250 panels on 17 acres of land. The largest in the state. GVSU Allendale campus, on 48th avenue, between Pierce street and Luce street. Generates enough energy to power 600 typical homes.

Which benefits?

12 SOLAR BLOCKS OVER 25 YEARS

The equivalent of:

- **192** tons of CO2 offset
- **144** trees planted
- **60** tons of landfill waste eliminated

CRAZY, NO?
